

**ASL LAUNCHES ITS FIRST “HONG KONG-MACAU-TAIWAN SOLUTION TOUR”  
JOINS HANDS WITH ALIBABA CLOUD & THE FIRST STOP OF FORUM HELD  
SUCCESSFULLY IN MACAU**

\* \* \* \*

*Foster Macau’s Smart City Development with its Leading-edge Cloud Computing and Security Technology  
Further Reinforces ASL’s Brand Image of “Leading Player in Hong Kong, Provider of Global Delivery”*

(Hong Kong, 11 April 2019) - **Automated Systems Holdings Limited** (“ASL” or “the Group”) (HKEX stock code: 771), a trustworthy and professional global information technology (IT) partner, announces today the launch of the first “ASL Solution Tour”, an annual flagship event of the Group, which will be comprehensively introducing the Group’s solutions by regions, businesses or focused technologies. Through this tour, the Group will be promoting the message of “Hong Kong Powerhouse • Global Delivery” to enhance its international brand image, and also promoting its one-stop, diversified and innovative IT services and solutions which assist customers in the process of frontend-to-backend digital transformation. The first stop of the “Macau Forum” held on 11 April in Macau enjoyed an unprecedented success.

The theme of “ASL Solution Tour 2019” is “Leading to Success with Innovation”, and the first stop of this tour was Macau, which will be followed by Taiwan and with Hong Kong as its last stop. It is expected that approximately 600 customers, partners and industry professionals from Hong Kong, Macau and Taiwan and approximately 50 leading IT providers are brought together in the whole tour to assist customers from different industries in using innovative technologies such as cloud computing, big data, network security, artificial intelligence and Internet of Things, leading them to the path of success.

“ASL Solution Tour 2019 • Macau” was held on 11 April at the Macau Tower, signifying the perfect beginning of the whole tour. As the organizer, ASL, has received strong support from its strategic partner Alibaba Cloud, the cloud computing and data intelligence arm of Alibaba Group, and both joined hands to organise this significant event in the industry. The theme and technical focus of the Macau forum was “Leading to Success with Innovation – Cloud and Security”. As a renowned one-stop systems integrator and IT services provider in Macau, and with its strengths of having over 20 years of experience in the industry and a comprehensive delivery network, ASL, apart from partnering with Alibaba Cloud, also invited 6 other IT providers (comprised of leading innovative technology providers of network security and artificial intelligence, including Darktrace, Fortinet, Intsignts, McAfee, Sangfor and Megvii) to take part in the event, which attracted senior executives from various industries to attend. Through 9 sharing sessions, technology panel and booth showcases, the event facilitated the discussion of measures to ensure network data security in different cloud computing environments. ASL not only will take an initiative to propel the development of Macau into a Smart City, but also will strive to provide one-stop IT services to corporate customers.

“ASL Solution Tour 2019 • Taiwan” will be held on 18 April at Taipei Marriott Hotel afterwards. Information permeates the world in this digital era. Huge amount of information is generated every day, and many enterprises have been utilizing leading technologies such as data analysis, data science and artificial intelligence to considerably enhance product experience of customers. In view of this, the theme and technical focus of the Taiwan forum will be “Leading to Success with Innovation – Data Transformation”. Apart from sharing the key technologies and development trends of Digital Transformation with the technology experts from Alibaba Cloud, Hitachi Vantara, Micro Focus, MongoDB, TmaxSoft, AgilePoint, Veritas and YITU in the forum, there will also be a “VIP Executive Dinner” to put collaborative efforts in developing a blueprint and strategies for digital enterprises with customers and leading professionals in the industry so as to reinforce the digital transformation of enterprises. Please stay tuned about the latest update of the event.

“ASL Solution Tour 2019 • Hong Kong” will be held on 28 June at JW Marriott in Admiralty, Hong Kong, and the theme and technical focus of the Hong Kong forum will be “Leading to Success with Innovation – Go Smart”. The event program is varied, as it will provide more booths, sessions and arrange technology panel as well as executive luncheon. The event will also gather more local and global leading IT providers to share about the latest Smart Technology and hence guiding enterprises into the digital era. Please stay tuned for the latest update of the event.

“ASL Solution Tour 2019” provides both public and private organisations with practical insights and solutions towards the implementation of digital transformation. As in the past, the Group will continue to leverage its strengths and collaborate with more renowned providers with leading-edge technologies or those who are leaders in the industry, in order to provide one-stop, international-standard and diversified IT solutions and services to global customers and to assist more customers in the process of frontend-to-backend digital transformation. In the future, the Group will continue to strive to bring its three main core values – “EMPOWER”, “SECURE” and “MANAGE” to customers, and to foster its leading position as the “trustworthy and professional global IT partner”.
